

Ayomide Bankole

Berlin, Germany | aysamuel007@gmail.com | +4917688414708

Product Manager with a strong engineering foundation, experienced in translating business goals into structured delivery plans, managing risks, dependencies, and high-quality production releases. Experienced in Fintech and HealthTech domains

CORE COMPETENCES

- Technical Product & Project Management
- Agile & Scrum Delivery (Sprint Planning, Reviews, Retrospectives)
- End-to-End SDLC Ownership
- Delivery Roadmaps & Milestone Planning
- Cross-Functional Team Leadership
- Stakeholder & Executive Communication
- Risk, Dependency & Change Management
- Release & Quality Management
- KPI, Velocity & Delivery Tracking
- Technical Documentation & Governance

SKILLS

Operations & Systems

- Workflow automation
- Funnel optimization
- CRM systems (Zendesk, Slack-based operations; can adapt to HubSpot quickly)
- Cross-functional process design
- Quality assurance & system monitoring
- Documentation & operational playbooks

Tools & Platforms

- Zendesk, Slack, Discord, Zoom
- Jira, Click-Up
- Git & GitHub (for version visibility + technical communication)
- Play Console, App Store, Trustpilot (customer feedback management)
- Social platform support (Twitter, Telegram, community moderation)

Technical & Product Skills

- API-influenced troubleshooting & system understanding
- SQL (DBEaver), NoSQL, and data lookups
- Dashboard monitoring tools (Grafana)
- Familiarity with modern web stacks (React, Node.js, etc.)
- Ability to communicate technical concepts clearly to non-technical customers

Communication & Soft Skills

- Strong written & verbal communication
- High empathy and customer-centric mindset
- Problem-solving & proactive ownership
- Data-driven decision making
- Ability to explain complex concepts simply
- High adaptability in fast-paced environments

EXPERIENCE

12/2025
Scotland, United Kingdom

Technical Product Manager, AGBC

- Managed cross-functional teams to deliver AGBC's **GRACE PORTAL iOS & Android app**, a multi-platform organization and community management system.
- Owned delivery governance, roadmaps, milestones, and success metrics aligned with business objectives.
- Facilitated Agile/Scrum delivery, including sprint planning, daily stand-ups, backlog refinement, and retrospectives.
- Oversaw risk, quality, and release management across the project.

- Coordinated stakeholders and ensured alignment between business, technical, and operational objectives.

01/2025 – 12/2025
Berlin, Germany

Frontend Engineer, BuildingMinds GmbH

Project & Delivery Leadership

- Acted as delivery lead for frontend initiatives, coordinating execution between product, design, architecture, and engineering teams.
- Led daily stand-ups, contributed to sprint planning and backlog refinement, and ensured alignment on scope, timelines, and dependencies.
- Owned end-to-end delivery of UI-driven initiatives including CMS integration, internationalization workflows, and feature rollouts.
- Defined delivery processes and documentation, improving sprint predictability, transparency, and cross-team collaboration.

Operational & Technical Achievements

- Collaborated cross-functionally with product owners, designers, and architects to translate complex requirements into scalable systems.
- Designed and maintained workflow processes for UI translations, CMS integration, and end-to-end feature delivery.
- Led daily standups and coordinated cross-team communication, improving cadence and sprint alignment.
- Analyzed platform behavior to debug issues, define root causes, and recommend improvements.
- Created internal documentation and improved development processes to increase team efficiency and delivery speed.

06/2023 – 01/2025
Berlin, Germany

Intern Software developer, BuildingMinds GmbH

Process & System Redesign

- Owned an redesigned the company's design-token pipeline, improving speed and accuracy of UI updates across the entire frontend.
- Translated UX flows an prototypes into structured, reusable components, improving development velocity.
- Collaborated with multiple teams to optimize content workflows and streamline translations for internationalization

2022 – 2023
Kharkiv, Ukraine

Software developer, Freelance

- Worked on using **HTML** and **CSS** to build web pages.
- Used **Javascript** to add interactivity to the pages.
- Began working with frameworks like **REACT** to build single page apps.
- Used **Expressjs** for the Backend services.

2021 – 2022
Remote

Second Line Technical Support, LATOKEN

Data Analysis & Product Optimization

- Used SQL and Grafana to analyze user behavior, identify bottlenecks, and recommend system improvements.
- Identified major UX issues and collaborated with product and engineering teams to redesign journeys and increase conversion.
- Contributed directly to a significant rating increase on Google Play (up to 4.5), improving inbound user trust—a *growth-marketing-aligned achievement*.
- Took on Scrum Master responsibilities, improving sprint operations, efficiency, and communication.

2020 – 2021
Remote

First-line Customer Success Manager, LATOKEN

Operations | Growth | Funnel Optimization

- Managed high-volume user funnels across Telegram, Zendesk, and mobile marketplaces; improved satisfaction by 15%.
- Mapped user pain points, analyzed behavior, and provided data-driven insights that influenced product decisions.

- Improved support team efficiency to 98% by optimizing operational workflows and designing better process structures.
- Supported acquisition and retention through community engagement and multi-channel communication strategies.

PROJECTS IN PIPELINE

Founder | MonieTally  , *Privacy-First Personal Finance App | Flutter (iOS & Android)*

- **Defined and owned the product roadmap** for a 10-module personal finance app spanning transactions, budgeting, savings goals, and advanced analytics across 29 screens, prioritising a privacy-first, local-first architecture with AES256 on-device encryption and zero backend dependency in Phase 1.
- **Drove security-first UX strategy, mandating biometric authentication (Face ID/fingerprint), PIN enforcement at onboarding, and a 5-minute idle session timeout** embedding security into the core user journey rather than treating it as a settings afterthought.
- **Architected a feature flag system covering 30+ runtime toggles (savings goals, budgets, guest mode, charts)** enabling phased rollouts, A/B testing, and safe experimentation without app store releases.
- **Owned the design system strategy** establishing a centralised token library (colour, typography, spacing, borders, gradients) and a 30+ component library under a consistent Traccia prefix, enforcing 4 state screen patterns (loading, empty, error, offline) across all data-fetching surfaces.
- **Scoped and prioritised 40 domain use cases across 7 analytics capabilities** (spending trends, category breakdown, period comparison, spending velocity, income vs. expense, top categories, custom reports) and 5 transaction flows, balancing feature depth with delivery timelines.
- **Established engineering quality standards including a 90%+ domain-layer test coverage target**, a mandatory 4-stage CI/CD pipeline (static analysis, Android APK/AAB build, iOS build, security scan via pana), and merge-blocking gates on all PRs.
- **Defined cross-platform scope (Android API 21+, iOS via CocoaPods)**, dark/light/system theme support, and a PDF export capability for custom financial statements, expanding the addressable user base without requiring a backend.
- **Championed a clean architecture mandate** (feature-first modules, use-case-per-responsibility, Either/Result error boundaries) that enabled parallel feature development across modules without cross-team dependency bottlenecks.

PROJECTS

GRACE PORTAL, *Organization & Community Management Platform*

- Led **end-to-end delivery of a multi-platform** system supporting users across multiple organizational units.
- Defined roadmap, milestones, success metrics, and managed a prioritized backlog of 100+ work items (MoSCoW prioritization).
- Implemented Agile/Scrum delivery with 2-week sprints; **facilitated planning, stand-ups, backlog refinement, and retrospectives**.
- Contributed to frontend and backend development (24,700+ lines of code across 81 components, Flutter-based).
- Oversaw CI/CD pipelines, multi-platform releases, technical quality, and risk mitigation.
- **Delivered 102+ features, production-ready** with zero critical security issues and GDPR-compliant.

EDUCATION

2022 – 2023
Berlin, Germany

Full Stack Web & App Development, *WBS Coding School*

- Completion of comprehensive training in software development, encompassing both functional and interactive aspects, as well as final design and presentation.
- Acquired a diverse range of skills in frontend and backend development, providing a well-rounded skill set.

- Skills attained include:
 - HTML5, CSS3, and Responsive Web Design
 - Frontend programming with JavaScript/React
 - Backend Programming with Node.js (Express)
 - Version Control Systems: Git & GitHub
 - Databases: SQL, NoSQL
 - Restful APIs
 - DevOps (Hosting, Deployment, Monitoring)
 - Software Testing (TDD)
 - Agile tools and methodologies

09/2012 – 07/2020
Kharkiv, Ukraine

Medicine, V.N. Karazin Kharkiv National University

- Bachelor of General Medicine
- The Face of African Medical Students Association (AMSA) Award 2018 - 2019
